BLUETOOTH CONNECTION TO SATELLITE NAVIGATORS

Follow the instructions of your N-Com Intercom to pair up and connect your N-Com system and the sat navigator.

Important:
- The information refer to the latest available firmware version, which can be downloaded from the N-Com Wizard programme (for N-Com systems that allow it).
- Contemporaneous management of mobile phone and GPS.

BRAND	MODEL	MOBILE PHONE	GPS CONFERENCE	NOTES
Garmin	Zumo 660	Yes	Yes	• Should you listen to the GPS directions with a bad quality audio, and to avoid damages to the loudspeakers, set the volume of the parameter "Navigation" to a maximum value of 50-70%. In case of need use the amplification of the N-Com device to increase the volume. • The navigator is equipped with A2DP protocol, which allows you to listen to music in high-quality stereo sound. When listening to music in this mode, you cannot activate the Bluetooth intercom with the passenger.
Garmin	Motorrad IV	Yes	Yes	• Should you listen to the GPS directions with a bad quality audio, and to avoid damages to the loudspeakers, set the volume of the parameter "Navigation" to a maximum value of 50-70%. In case of need use the amplification of the N-Com device to increase the volume. • The navigator is equipped with A2DP protocol, which allows you to listen to music in high-quality stereo sound. When listening to music in this mode, you cannot activate the Bluetooth intercom with the passenger.
Garmin	Zumo 550-500	Yes	Yes	
Garmin	Zumo 350 LM	No	Yes	• Once the helmets and the navigator are paired up, the Rider-Passenger connection does not occur automatically. In order to use the intercom mode, you have to activate the connection by briefly pressing "ON".
Garmin	NUVI 510	No	Yes	• Once the helmets and the navigator are paired up, the Rider-Passenger connection does not occur automatically. In order to use the intercom mode, you have to activate the connection by briefly pressing "ON".
